Priyanshi Jain
frontend Developer

with a proven ability to collaborate effectively with senior developers My goal is to make interative userfriendly website and easy to use , Seeking for a Developer position where I can utilize my skills and contribute to the growth of organization

PROJECTS

HTML and CSS

E-cars Website - By HTML and CSS , its efficient for both desktop as well as mobile screen

Javascript

Form Validation- Create Form Using HTML ,CSS,JAVASCRIPT with all its validation

Quiz app - User can play quiz and able to see result in last

Data-Structure

Credit-card-app using Queue - where user can diposite amount and can able to check current balance

React

Shoplane - E-commerce Website -- where I use Fake Api for data ,routing , Adding to cart and removing product from Cart also user can access favorites after login is correct , redux toolkit for state management , formik and Yup for form , validation and Boostrap
